

## **Dr. Fred Speckeen Theatre**

### **Information and Technical Specifications**

#### **Location**

Fairview Alberta  
Part of the Recreational complex of GPRC Fairview  
Loading Dock is at the East end

#### **Capacity**

The FST seats a maximum of 311 patrons. This number is modified by use of the inhouse audio position or wheel chair patrons.

#### **Technical Overview**

- The theatre is equipped with professional dimming, lighting, video/data and audio reinforcement equipment.
- For all Larger shows, the FST will come with a supervising technician and a Front-of-House Coordinator.
- All rigging is done by genie lift or from the catwalks. There is no Fly Gallery. Please talk to theatre personnel about any and all rigging prior to load-in. The Theatre reserves the right to limit, change or veto any rigging requests. The Theatre does not have rigging equipment available for show use.
- Extra crew may be requested / required for set-up, tear-down or show support and additional fees will apply.
- No additional rooms, rehearsal spaces or storage spaces are available currently.

#### **Stage Dimensions & info**

- Main curtain (full opening ~36', normal ~32').
- Working area ~32'w X 24'd including 8' stage level, semi-thrust style, orchestra pit.
- Wings are ~15' with 8' fully hidden.
- There is a hallway crossover within the theatre.
- Usable Floor is not sprung but is lap'd wood with a plywood deck. Top surface is painted Masonite, matte black 40' wide. Wings are painted concrete.
- The Theatre does not presently have any working trap doors in the floor.
- A Rosco™ dance floor that fills main area can be made available within negotiations.
- 3 usable wing entrances when using full stage. Leg spacing is approximately 4'.

#### **AKA:**

Fairview theatre, Rec centre auditorium

#### **Accessibility:**

Dedicated, with excellent sightlines, wheelchair and mobility restricted seating.  
No IR hearing assistance currently installed.

## **Soft Goods:**

All curtains are on hard mounted swivel tracks.

Mains are orange velour, Centre split, 32' normal opening, Hand driven.

- 2 sets of legs, black velour, 8' wide, manually drawn, on swivel mounts.
- No Cyc nor upstage black curtain is installed. Back wall is black painted drywall.
- Video projection Screen, 24x24 motor driven is against back wall, upstage of Main curtains.

## **Dressing Rooms**

- 2 x 6 person Dressing rooms are available backstage.
- Complete with washrooms, makeup mirrors, & program sound.
- Additional storage rooms in the area may be arranged to assemble large groups of people.

## **Greenroom**

There is no official greenroom.

## **Shop**

There is no shop available for use.

## **Special Effects**

Any and all special effects must be cleared with the Theatre personnel prior to set-up.

Controlled "Special effects" shall include but not be limited to smoking, live flame, pyrotechnics, flying, stage fights, sword play, smoke or fog, and any electrical devices.

Permission will be granted to most well thought out and safe effects.

**Full federal permits & licenses must be produced for any pyrotechnical effect.**

**The Theatre reserves the right to control, change, limit or veto any and all special effects.**

## **Loading Area**

A ground level loading dock is available stage level - USL. Standard size garage door.

Lobby doors are standard double man doors.

## **Control Booth**

Booth Location is back left of house, with full opening windows. Access is via lobby. No easy access is available from stage. (outside or thru house)

The booth contains the main control of all lights, sound & video projection.

The in-house mix position is back of house in the HL wheelchair position. Use of in-house mix position will reduce seating by ~6.
