LEARNING OUTCOMES:

Upon successful completion of this course, learners will be able to:

- Recognize how enterprise environmental factors and organizational process assets affect how projects can be managed
- Explain the five stages of a project life cycle and illustrate how these stages can overlap in time
- Demonstrate how to create a project management plan with subsidiary plans for each of the knowledge areas and explain how progressive elaboration and integrated change management can keep these documents effective and relevant
- Explain the overlapping nature of project activities and practice Project Integration Management to coordinate the various project management processes
- Illustrate how a project's various baselines (including scope, cost, schedule, quality, risk, procurement, and others) are determined, planned for, and managed

- Recognize how to effectively manage human resources and communicate with all stakeholders
- Explain the key methods used to estimate project schedule and cost at the beginning of a project and to forecast cost and schedule variances at any time during the project
- Identify key project stakeholders and continuously engage them in appropriate project activities
- Describe how the project management knowledge contained in the PMBOK® Guide can be used in practice
