

# Grande Prairie Regional College

## Department: Academic Upgrading

### COURSE OUTLINE – FALL 2009 & WINTER 2010 CH 0120 5 (4 – 0 – 2) HS Chemistry Grade 11 Equivalent

---

<b>Instructor</b>	Nancy Fraser	<b>Phone</b>	539 – 2980
<b>Office</b>	J – 216	<b>E-mail</b>	nfraser@gprc.ab.ca
<b>Office Hours</b>	As posted on my office door.		

---

**Prerequisite(s)/corequisite(s):** CH 0110 and MA 0110 or SC 0100/MA 0110

A minimum grade of 60 % in CH 0110 or SC 0110 and MA 0110 is recommended.

**Required Text/Resource Materials:** ☺☺☺ **General Chemistry by Ebbing 8<sup>th</sup> Edition**

☺☺☺ **Chemistry 0110 Review** if you were not in SC 0110 last semester.

- **CH 0120 lab manual**
- Lab coat
- Lab notebook (250 page coiled notebook is fine do not spend the money on a real lab notebook)
- **Nonprogrammable calculator** – this is the only electronic device allowed during tests or exams.
- 10 quad to 1 cm graph paper are also required.

**Supplementary texts:** *These textbooks are available in A-204*

Chemistry 0110 Review by Fraser

Chemistry: A Study of Matter by Dorin

Introductory Chemistry: Zumdahl

Basic Chemistry by Seese and Daub 7<sup>th</sup> Edition

Chemistry: A Basic Introduction by Miller 4<sup>th</sup> Edition

**Description:** This course is designed to provide the student with an understanding of the following chemical concepts: Bonding, Chemical Equations, Stoichiometry, Gas Laws, Solutions, Equilibrium, and pH.

**Delivery Mode(s):** Lecture will be the main method of delivery. There is also a large laboratory component in this course.

**Credit/Contact Hours:** This is a 5 credit course and meets 6 hours per week (4 hour lecture and 2 hours lab).

**Assumed Background Knowledge:** (These topics will **NOT** be reviewed in class)

Students should already:

1. be able to perform linear, quadratic, cubic, liquid-dry metric conversions.
2. know elementary atomic structure – what protons, electrons, and neutrons are and where they are in an atom.
3. be able to define atomic number, atomic mass number and how to use them to calculate the number of protons, neutrons, and electrons in an atom.
4. be able to classify of matter.
5. be able to distinguish between chemical and physical properties and changes.
6. be able to draw atomic structure diagram for the first 20 elements.
7. be able to define valence electrons and draw electron dot diagrams.

*If you are unfamiliar with these topics see me. The Chemistry 0110 Review will explain these in detail. It is available in the bookstore. There is an answer key in A-205 and on reserve in the library.*

**In addition to the above material:** These topics will be briefly reviewed in class.

1. know nomenclature (naming compounds and writing formulae). \*\*\*Nomenclature is one of the most important topics that you will learn at the secondary level. It will NOT be reviewed at the post secondary level. If you are having trouble with this topic, get help IMMEDIATELY!!! See me!\*\*\*
2. be able to balancing equations by inspection.

**Objectives:**

Students should

1. be able to do nomenclature **without** the use of a periodic table.
2. be able to solve a variety of stoichiometry problems.
3. be able to calculate the % composition of each element in a compound.
4. be able to define and find empirical formulae given % composition by mass of each element.
3. understand the kinetic molecular theory of gases.
4. know and define gas laws (Boyle's Law, Charles' Law, combined gas laws, the ideal gas law.) Volume of gases under STP conditions and SATP if time permits.
5. be able to define temperature, pressure, vapour pressure, and boiling point.
6. be able to define solubility, and state factors affecting solubility and the rate of solution.
7. be able define unsaturated, saturated, supersaturated solutions and interpret solubility curves.
- 8 be able to solve stoichiometry problems from chemical equations including determining the limiting reagent.
8. understand equilibrium, write equilibrium equations for given reactions and understand the effect of changing concentration.
9. be able to write solubility product expression for given compounds.
10. understand and define  $K_w$  and pH and to able to perform related calculations.
11. be able to write the electronic and orbital box diagrams for any element.
12. be able to compare the reactivity and radius based on atomic and electronic structures, ionization energy and electronegativities.
13. be able recognizes trends in the periodic table.
14. be able to draw the structural diagrams for various molecules etc. using VSEPR.
15. be able to distinguish between polar, nonpolar covalent and ionic bonds by calculating. the difference in electronegativities and observing the shapes of molecules.

16. be able to recognize and define a coordinate covalent bond.
17. be able to recognize and define polar, and nonpolar molecules from the diagrams.
18. be able to recognize and define hydrogen bonding, and Van der Waal's force.

**Grading Criteria:** Regular attendance is expected of all students, and is crucial to passing this course. Students who miss classes will soon find themselves falling behind and failing. Lateness will **not** be tolerated as it interrupts the instructor and fellow classmates.

As per Department Policy, if you miss more than 10 per semester of classes in any course, you may be debarred from the final exam for that course.

A certificate (a doctor's or a note from the funeral home) will be required to make up the midterm or final exam. **You will receive a grade of F if you miss the final.** Call if you are going to miss a test. There may be a deduction of 10% for test rewrites.

**\*\*\*Very important:**

**Laboratory attendance to each specific experiment is compulsory; a passing grade in the laboratory component is required to pass the course.** There are **NO** 'make up' labs in this course. Being absent from an experiment will result in a grade of **ZERO** for that experiment.

Lab reports must be submitted on the required date and at the **required time.**

Assignments may not be accepted after the assignment has been returned to the class. I am usually a speedy marker and usually return papers the next day.

Penalties for late **assignments** are as follows: (Assuming that I have not returned the marked assignments)

1 day late – 20%, 2 days late – 50%, 3 days late – 100%

Penalties for late **lab reports** are as follows:

5 minutes – 10%, 24 hours – 20%, after that – 100%

**Marking Scheme:**

Lab Reports:	15%
Assignments:	15%
Tests:	15%
Midterm:	15%
Final Exam:	<u>40%</u>
Total	100%

**Grades will be assigned on the Letter Grading System**

**Academic Upgrading Department  
Grading Conversion Chart**

<b>Alpha Grade</b>	<b>4-point Equivalent</b>	<b>Percentage Guidelines</b>	<b>Designation</b>
<b>A<sup>+</sup></b>	<b>4</b>	<b>90 – 100</b>	<b>EXCELLENT</b>
<b>A</b>	<b>4</b>	<b>85 – 89</b>	
<b>A<sup>-</sup></b>	<b>3.7</b>	<b>80 – 84</b>	<b>FIRST CLASS STANDING</b>
<b>B<sup>+</sup></b>	<b>3.3</b>	<b>76 – 79</b>	
<b>B</b>	<b>3.0</b>	<b>73 – 75</b>	<b>GOOD</b>
<b>B<sup>-</sup></b>	<b>2.7</b>	<b>70 – 72</b>	
<b>C<sup>+</sup></b>	<b>2.3</b>	<b>67 – 69</b>	<b>SATISFACTORY</b>
<b>C</b>	<b>2.0</b>	<b>64 – 66</b>	
<b>C<sup>-</sup></b>	<b>1.7</b>	<b>60 – 63</b>	
<b>D<sup>+</sup></b>	<b>1.3</b>	<b>55 – 59</b>	<b>MINIMAL PASS</b>
<b>D</b>	<b>1.0</b>	<b>50 – 54</b>	
<b>F</b>	<b>0</b>	<b>0 – 49</b>	<b>FAIL</b>

\*\*\*\*\*

**It is recommended that you have a grade of 60 % or better to continue to CH 0130.**

\*\*\*\*\*

**Transferability:** This course is equivalent to Alberta grade 11 chemistry and is transferable to other post secondary institutions.
