COURSE OBJECTIVES: The course will cover techniques of integration; inverse functions;
L'Hospital's rule; improper integrals; approximate integration; applications of integrals.

LEARNING OUTCOMES: At the end of this course, students should be able to:
evaluate integrals by integration by parts, inverse substitution, trigonometric substitution, and partial fractions; compute limits using L'Hospital's rule; evaluate improper integrals; approximate integrals using Midpoint, Trapezoid, and Simpson's rules; identify invertible functions and differentiate their
inverses; evaluate derivatives and integrals involving logarithmic, exponential, inverse trigonometric, hyperbolic and inverse hyperbolic functions; apply integration to solve problems involving volume, surface area, arc length, work, probability, moments, centres of mass, and centroids.

TRANSFERABILITY: Please consult the Alberta Transfer Guide for current transfer information (www.albertatransfer.com)
** Grade of D or D+ may not be acceptable for transfer to other post-secondary institutions. Students are cautioned that it is their responsibility to contact the receiving institutions to ensure transferability.
