

#### **DEPARTMENT OF BUSINESS**

### **COURSE OUTLINE - WINTER 2011**

### MG 3120 - Applied Statistics for Business and Economics II

**INSTRUCTOR:** Charles A. **PHONE:** 780 539 2846

Backman

**OFFICE:** C413 **E-** cbackman@gprc.ab.ca

MAIL:

**OFFICE** 

HOURS: TBD

## PREREQUISITE(S):

MS3010 or ST1510

### REQUIRED TEXT/RESOURCE MATERIALS:

Groebner, David, Patrick Shannon, Phillip Fry, and Kent Smith, 2011, Business statistics – A decision making approach, 8<sup>th</sup> edition, Pearson/Prentice-Hall, 912 pp.

#### CALENDAR DESCRIPTION:

Statistical inference for variance; statistical inference for the means; proportions and variances from two populations; analysis of variance; non-parametric statistics; joint probability distributions; marginal and conditional distributions; covariance; correlation and independence; contingency tables; simple linear regression; multiple linear regression; nonlinear regression; and time series analysis are topics covered in the course

#### CREDIT/CONTACT HOURS:

This is a 3 credit course with 3 hours of lecture per week and 1 hour of lab per week. The 1 hour of lab will take place as a 2 hour lab every other week. A

total of 60 hours are assigned for this course. Students are expected to attend all lectures and lab sessions.

# **DELIVERY MODE(S):**

Lecture and laboratory

#### **OBJECTIVES:**

To understand the objectives of statistics, the information that it generates, and how the information can be used in students' business careers.

To create an awareness of different types of situations where it can be used to excel and compete in the field of business.

To develop the ability to use computer and computer software(s) in order to present the information in a standard professional format.

#### TRANSFERABILITY:

\*\* Grade of D or D+ may not be acceptable for transfer to other postsecondary institutions. Students are cautioned that it is their responsibility to contact the receiving institutions to ensure transferability.

### **GRADING CRITERIA:**

#### **Ouizzes**

Up to 10 Quizzes – 10%

### Assignments

Three assignments - 15%

#### Laboratories

Lab assignments 20% There are between 5 and 7 lab assignments

#### Exams

First Exam 15% Second Exam 15% Third Exam 15%

### **Participation**

Lecture/lab 10%

### **Assignment and Exam Policies:**

1. Assignments will be handed in at the beginning of class on the due date.

- 2. Exams will be written as scheduled.
- 3. Final examinations will be scheduled by the Registrar during the period of normal exams in April, 2010. **Do not plan any activities during this period.**
- 4. Exams will take place during the time set aside for the stat labs. The exam will be a sit down and may be using a computer format.

Grades will be assigned on the Letter Grading System.

Alpha Grade	4-point	Percentage	Designation
	Equivalent	Guidelines	
<b>A</b> +	4	90 – 100	EXCELLENT
A	4	85 – 89	
<b>A</b> -	3.7	80 – 84	FIRST CLASS
			STANDING
B+	3.3	76 – 79	
В	3	73 – 75	GOOD
В-	2.7	70 – 72	
C+	2.3	67 – 69	SATISFACTO
			RY
С	2	64 – 66	
<b>C</b> –	1.7	60 – 63	
D+	1.3	55 – 59	MINIMAL
			PASS
D	1	50 – 54	
F	0	0 – 49	FAIL

#### **EXAMINATIONS:**

There are three Exams in this course. Each exam is non cumulative to the extent that material covered in prior classes is not required to understand the current material.

#### STUDENT RESPONSIBILITIES:

Each student is expected to come to class **on time**, having read the material and completed the assignments. Note that participation marks will be based not only on the contribution made to the class by the student but also on professionalism exhibited. **Note:** The use of cell phones is unprofessional and is distracting to the instructor and fellow students.

#### STATEMENT ON PLAGIARISM AND CHEATING:

Please refer to pages 49-50 of the College calendar regarding plagiarism, cheating and the resultant penalties. These are serious issues and will be dealt with severely.

### **COURSE SCHEDULE/TENTATIVE TIMELINE:**

### Week 1 Jan 3-9

• Introduction (Distribute course outline)

### Week 2 Jan 10-16

Data collection and description

Reference: Chapter 1, 2, 3

• Review of some important discrete probability distribution

Reference: Chapters 5

## Week 3 Jan 17-23

• The Normal distribution

Reference: Chapter 6

• Review of sampling and sampling and sampling distributions

Reference: Chapter 7

### Week 4 Jan 24-30

• Review of confidence intervals

Reference: Chapters 8

## Week 5 Jan 31 - Feb 6

• Review of hypothesis testing

Reference: Chapter 9

## Week 6 Feb 7 -13

# Exam 1 (Weeks 1 through 4)

• Two sample tests

Reference: Chapter 10

# Week 7 Feb 14-20

• Analysis of variance

Reference: Chapter 12

## Week 8 Feb 21-27

Reading week

# Week 9 Feb 28 - Mar 6

• Chi squared and non parametric tests

Reference: Chapter 11

## Week 10 Mar 7-13

- 2nd Exam (Week 5, 6, 7 and 9)
  - Bivariate analysis for quantitative variables

Reference: Chapter 14

## Week 11 Mar 14-20

• Simple linear regression

Reference: Chapter 14

## Week 12 Mar 21-27

• Linear/Multiple linear regression

Reference: Chapters 14 and 15

# Week 13 Mar 28-April 3

• Multiple regression

Reference: Chapter 15

## Week 14 Apr 4-10

• Multiple regression model building

Reference: Chapter 15

## Week 15 Apr 11-13

# 3rd Exam (Week 10, 11, 12, 13, and 14)

• The instructor reserves the right to change or cancel any of these dates and topics.

#### LABORATORY SCHEDULE

There is a 1 hour lab attached to the 3 hour lecture per week. In order to get the most out of the lab sessions, the 1 hour lab time per week will occur as a 2 hour lab every other week or as identified in the attached schedule.

There are two objectives linked to the attached laboratories: (1) review familiarity with Excel as a tool in statistical analysis; (2) Application of statistical techniques learned in class time to real life problems.

Week	Laboratory #	Topic	
One			
Two	Lecture	Data collection and	
		description	

Three	One	Methods of describing sets of data	Kentucky Milk Case P.1 or
Four	Two	Random variables and	Similar Furniture Fire
		probability	Case or similar
		distributions/inferences	
		based on a single	
		sample	
Five	Three	Single sample test of	Kentucky Milk
		hypotheses and two	Case P. 2 or
		sample confidence	similar
		intervals and test of	
		hypotheses	
Six	EXAM I	Weeks One through	Ch. 1, 2, 3, 5, 6,
		Four	7, and 8
Seven			
Eight	Reading Break		
Nine	Four	Comparing more than	Discrimination in
		two means/Chi squared	the work place or
		and contingency tables	similar
Ten	EXAM II	Weeks Five through	Ch. 9, 10, 11,
		Nine	and 12
Eleven	Five	Bivariate analysis and	TBD
		simple regression	
Twelve	Six	Multiple linear	Condo Sales
		regression/model	Case or similar
		building	
Thirteen	Seven	Multiple linear	Condo Sales
		regression/model	Case or similar
		building (cont'd)	
Fourteen			
Fifteen	Exam III	Weeks Ten through	Ch. 14 and 15
		Fourteen
