Midterm exam	20%
Wheelchair/Blind Assignment	10%
Disability Research Paper	15%
Practical Experience and Log	25%
Final exam	30%
Total	100%

Late assignments will receive deductions of 20% per day late.

COURSE CONTENT:

This course will provide students with an overview of physical activity and leisure services to special populations, the nature of such groups, models of service delivery, and the roles(s) of recreational practitioners and physical educators in serving the needs of special populations.

Course content will be presented through various methods such as lectures, guest lectures, films, videotapes, slides, panel discussions, and small group research.

COURSE OBJECTIVES:

- To dispel common myths and stereotypes related to special populations and to examine the relationship between attitudes(s) and service delivery.
- To acquire knowledge about important characteristics of people with a disability or special need(s) and the relationship of these characteristics to the development of services in physical activity and leisure.
- To introduce the students to the process of integration in the school and community settings.
- Through the completion of projects and assignments, students will have an
 opportunity to develop some basic skills and leadership techniques in working
 with special populations.
- To provide students with the opportunity to conduct research into a particular area
 of special populations (eg. persons with brain injuries, youth at risk, elderly
 persons, persons with alcohol or substance abuse problems, in poverty, etc.).
- To expose students to physical activity and leisure resources, programs and services currently provided to persons with disabilities or special needs.
